## Offensive Security Intro :-

what is offensive Security? → Task 1

"To outsmart a hacker, you need to think like one".

* This is the core of "offensive Security". It involves breaking into computer systems, exploiting software bugs, and finding loopholes in applications to gain unauthorized access. The goal is to understand hacker tactics and enhance our system defences.

* In this lesson, you will guide through hacking your first website in a safe and legal environment. The goal is to show you how an ethical hacker operates. Before this lets have small quiz.

Quiz :-

1) Which of the following options better represents the process where you simulate a hackers actions to find vulnerabilities in a system?

a) offensive security  b) Defensive security

Task 2 :- Hacking your first machine

I have uploaded a document in github

FakeBank web Enumeration.pdf

Careers in cybersecurity :-

How can i start learning?

people often wonder how others become hackers (security consultants) or defenders (security analysts fighting cybercrime), and answer is simple. Break it down, learn an area of cybersecurity you're interested in, and regularly practice hands on exercises. Build a habit of learning a little bit each day on try hack me.

Try hack me helped many people to get their first job.

Security engineer, Security professionals.
