

INTRO to LAN:

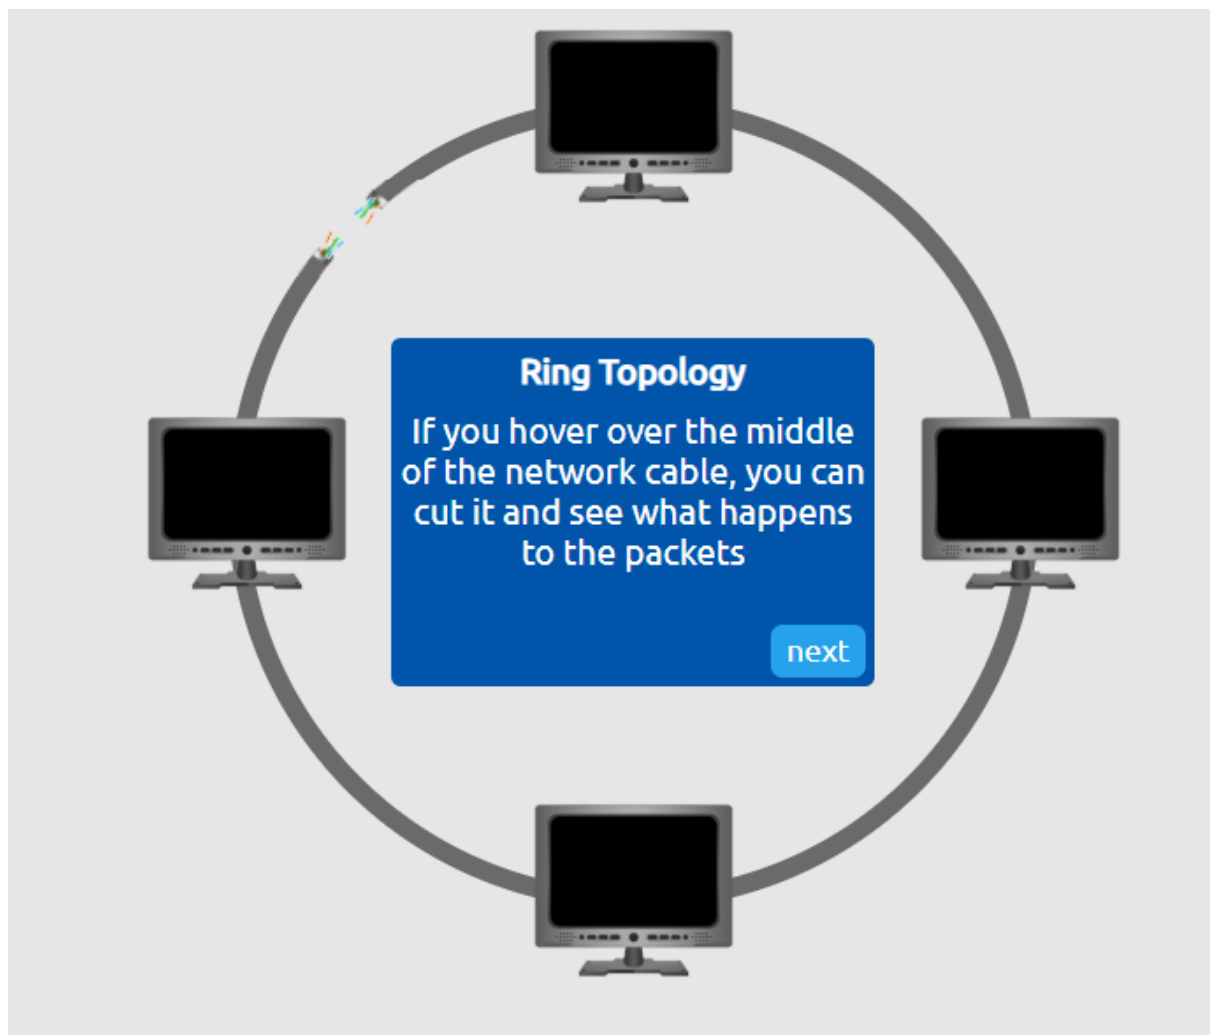

Ring Topology:

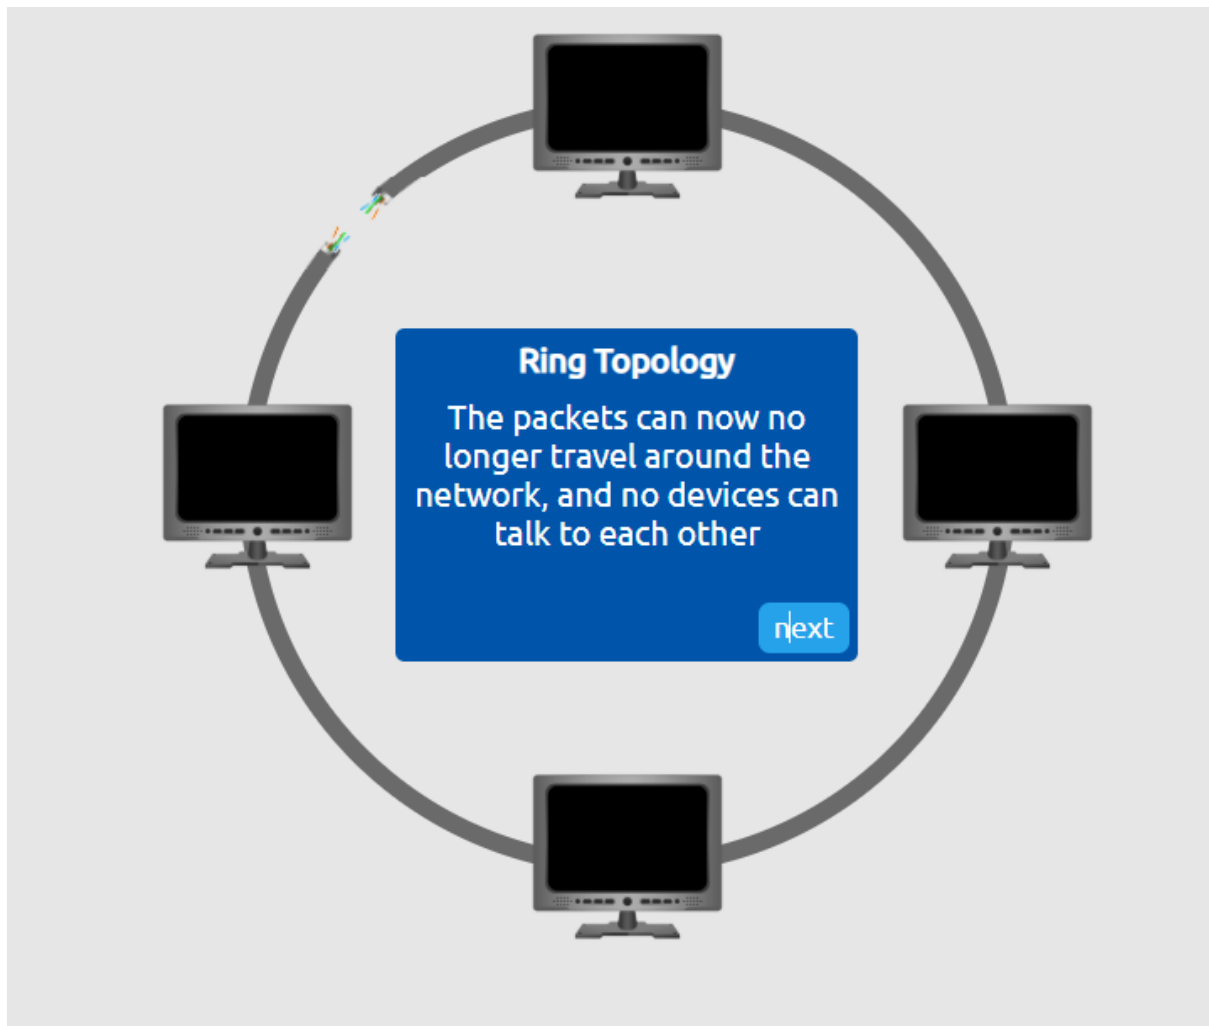

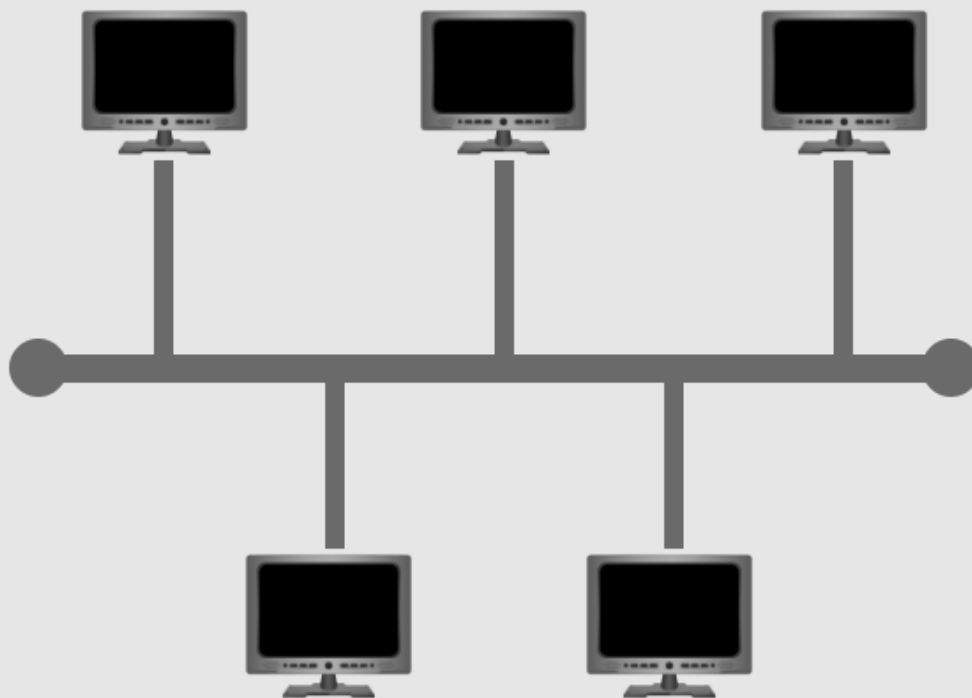

Cut wit scissor

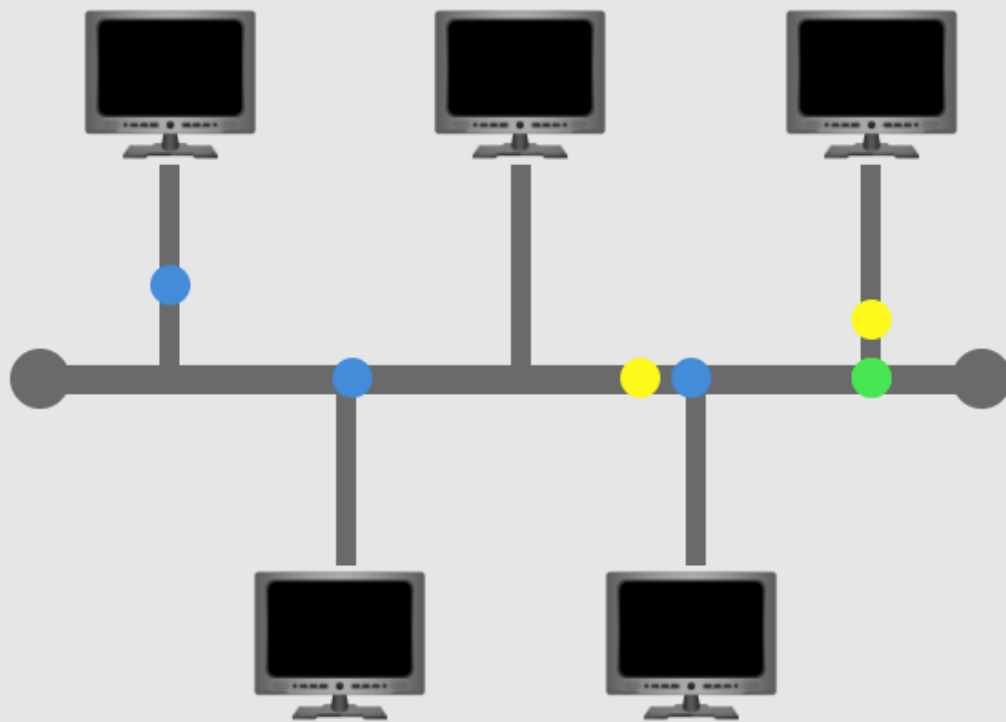

BUS TOPOLOGY:

Bus Topology

With a bus topology, all devices are connected to a single cable, often called the backbone

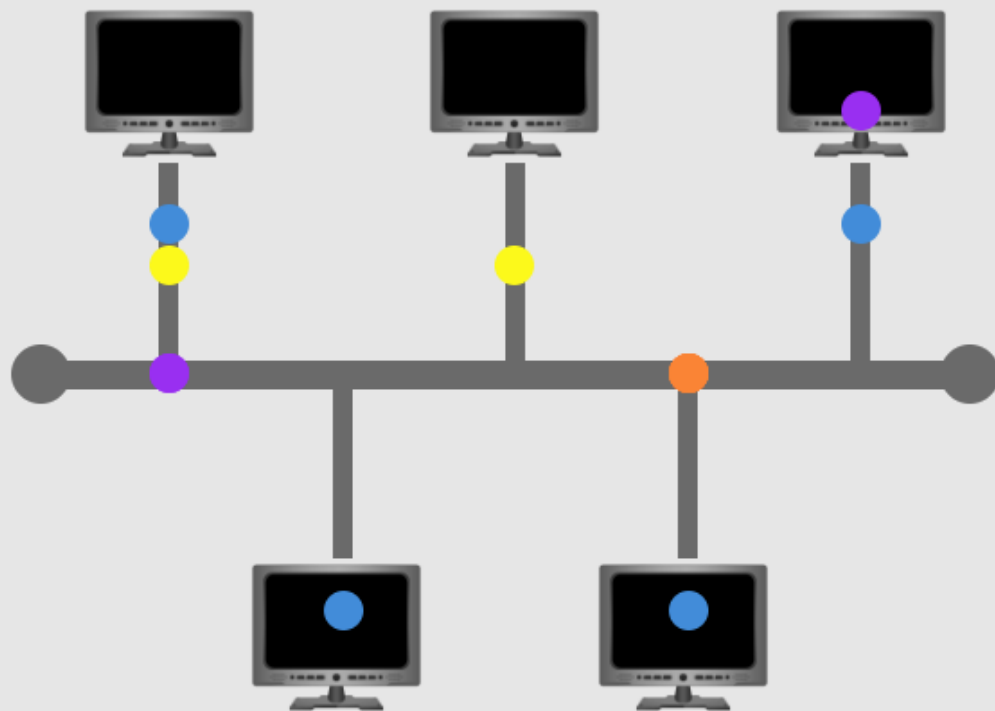

next

Bus Topology

Data is sent in both left and right directions down the backbone until the packet's destination is reached

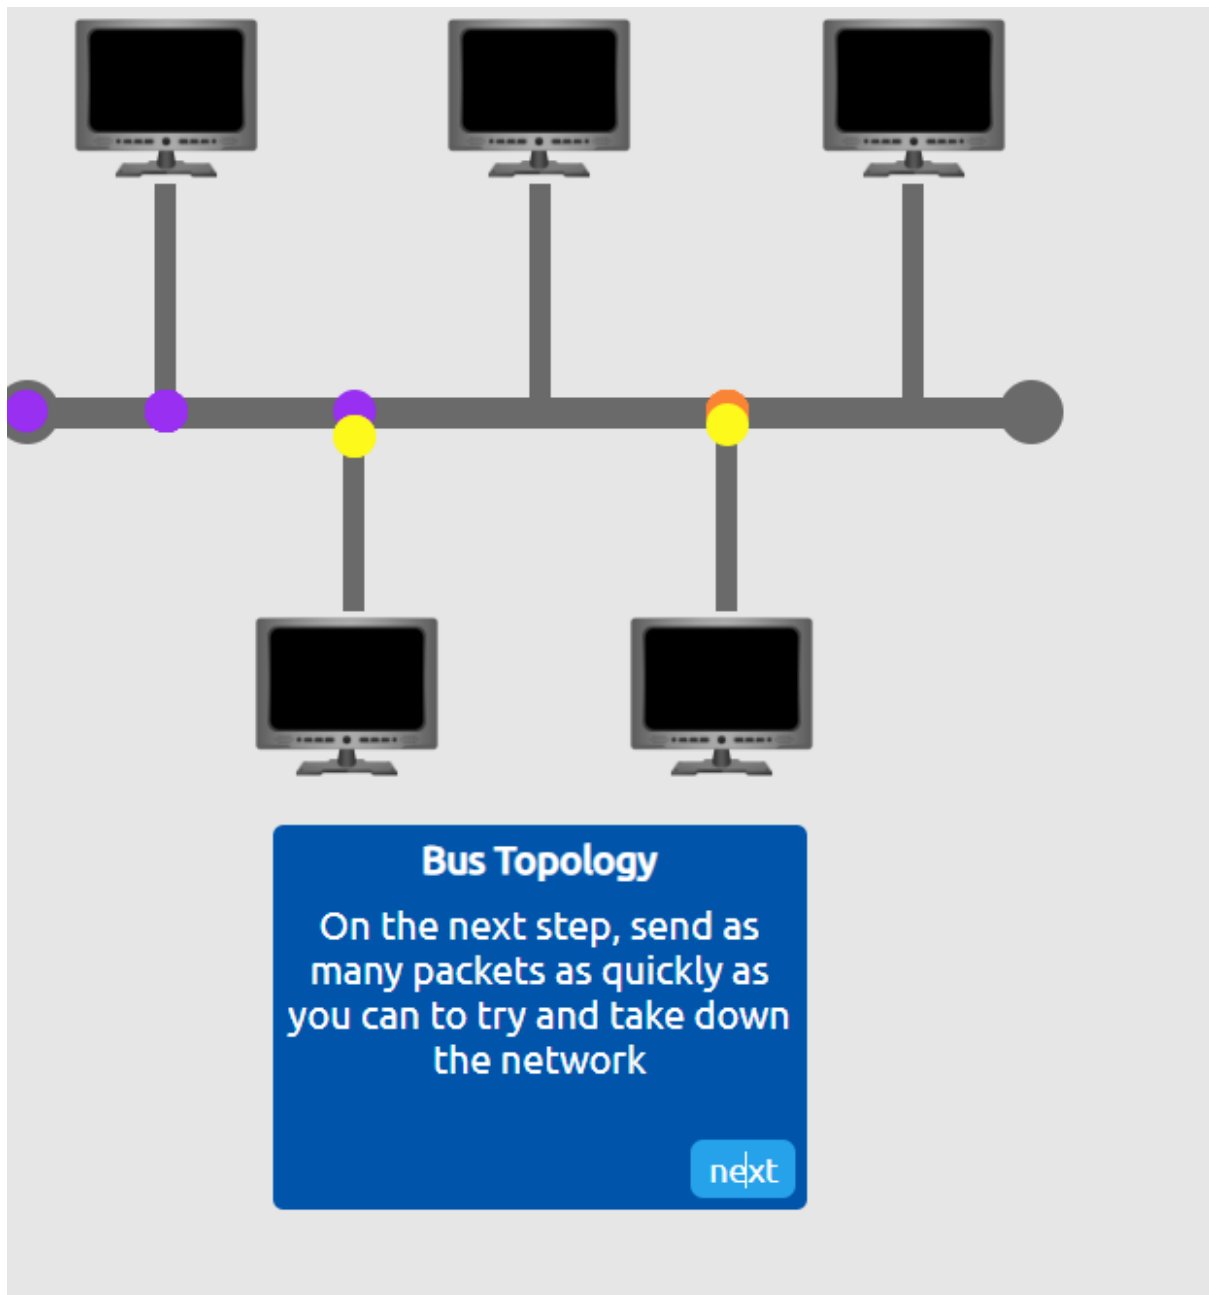

next

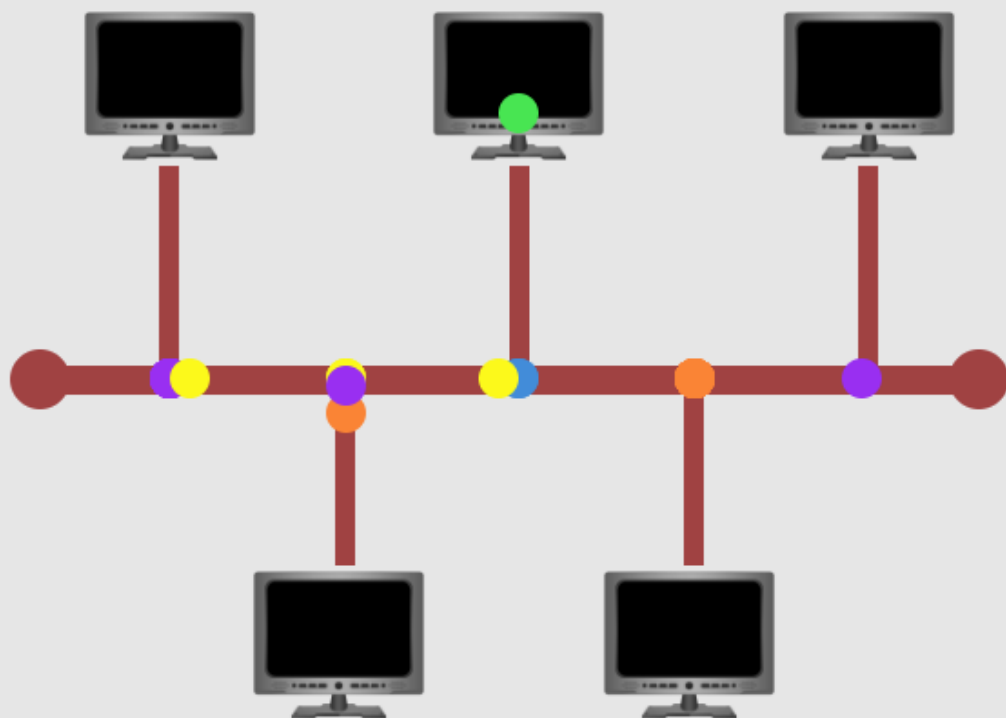

Bus Topology

A major flaw in the bus topology is that it can't handle a large amount of data

next

You can edit computers and see

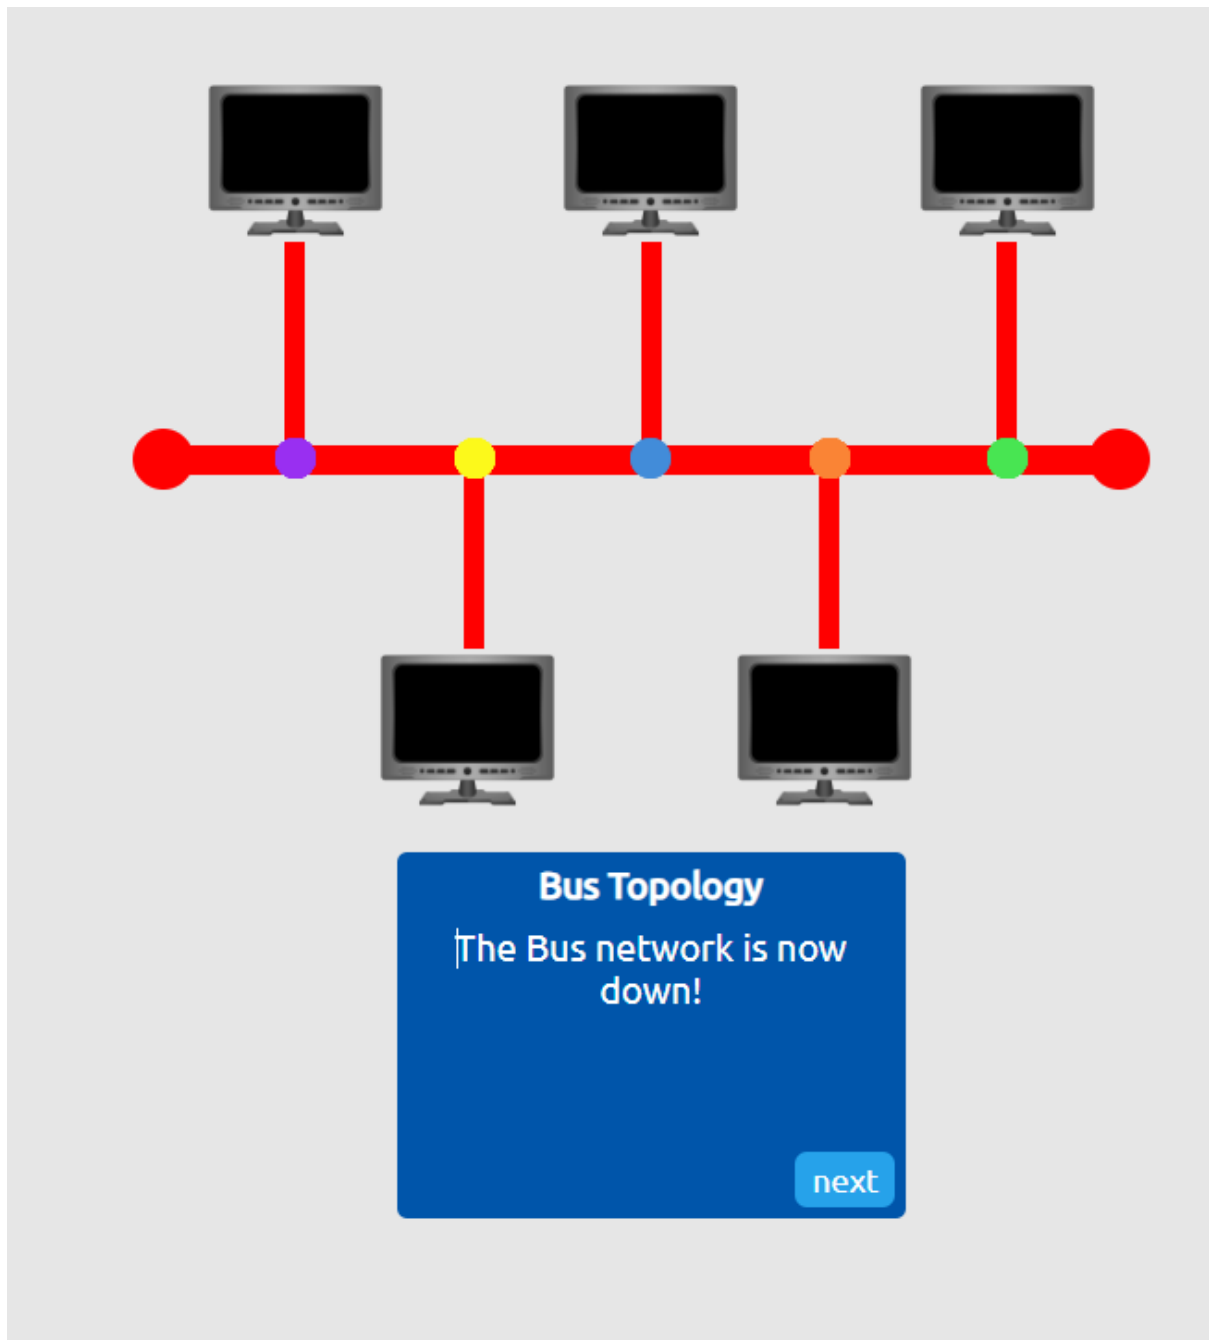

Bus Topology

computer5 ▾

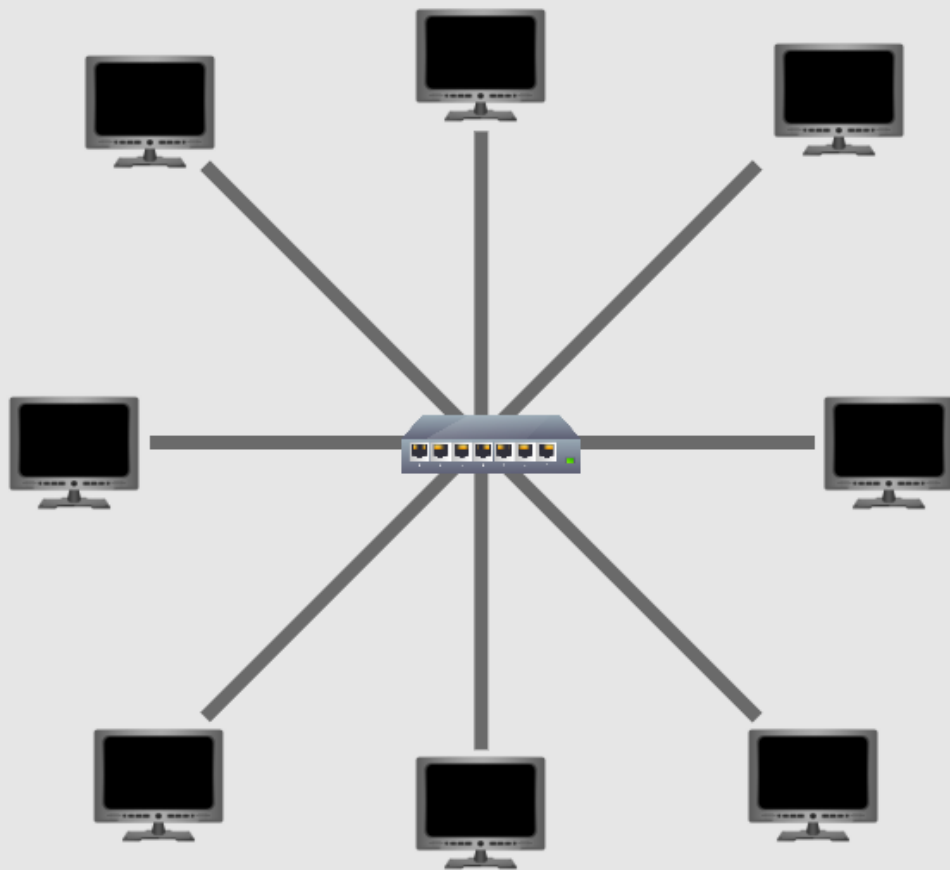

to

computer4 ▾

send packet

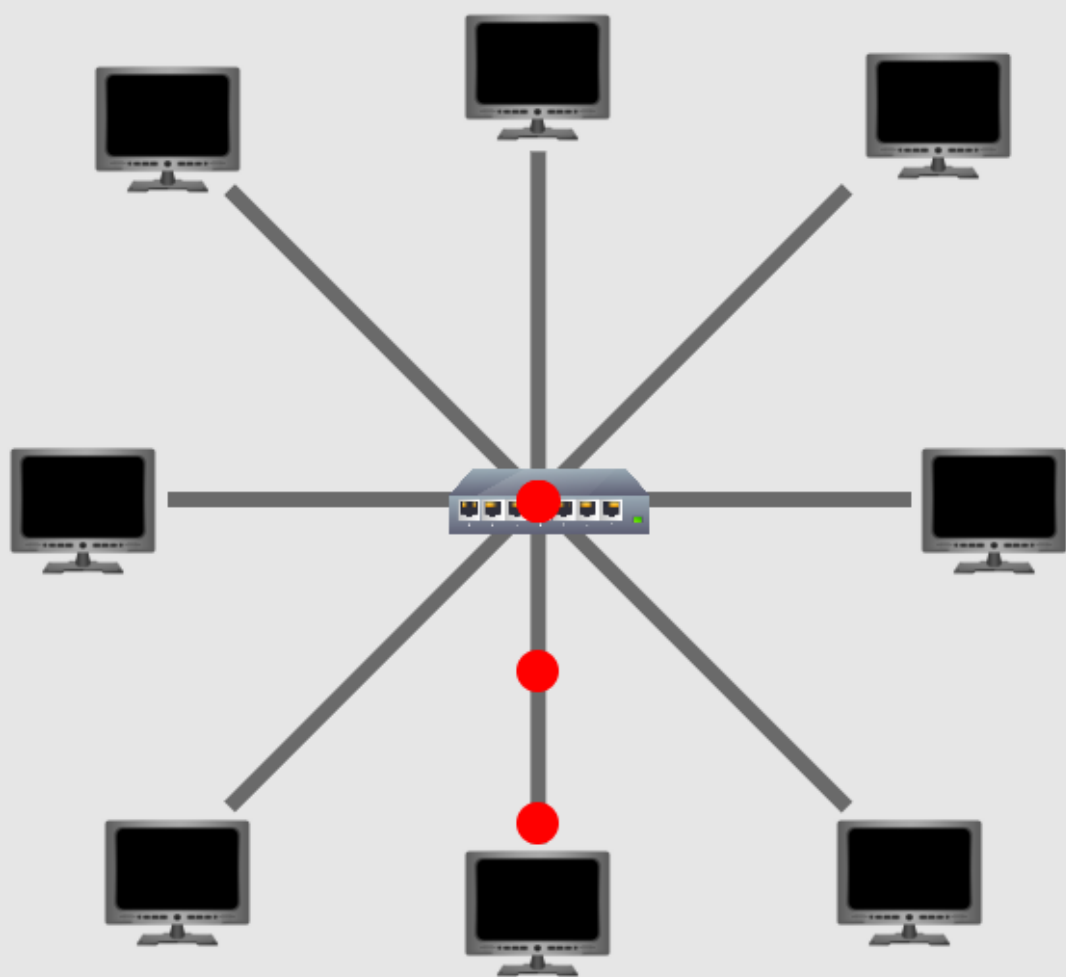

Star Topology:

Star Topology

With a star topology, all devices are connected with their own cable to a central switch/hub

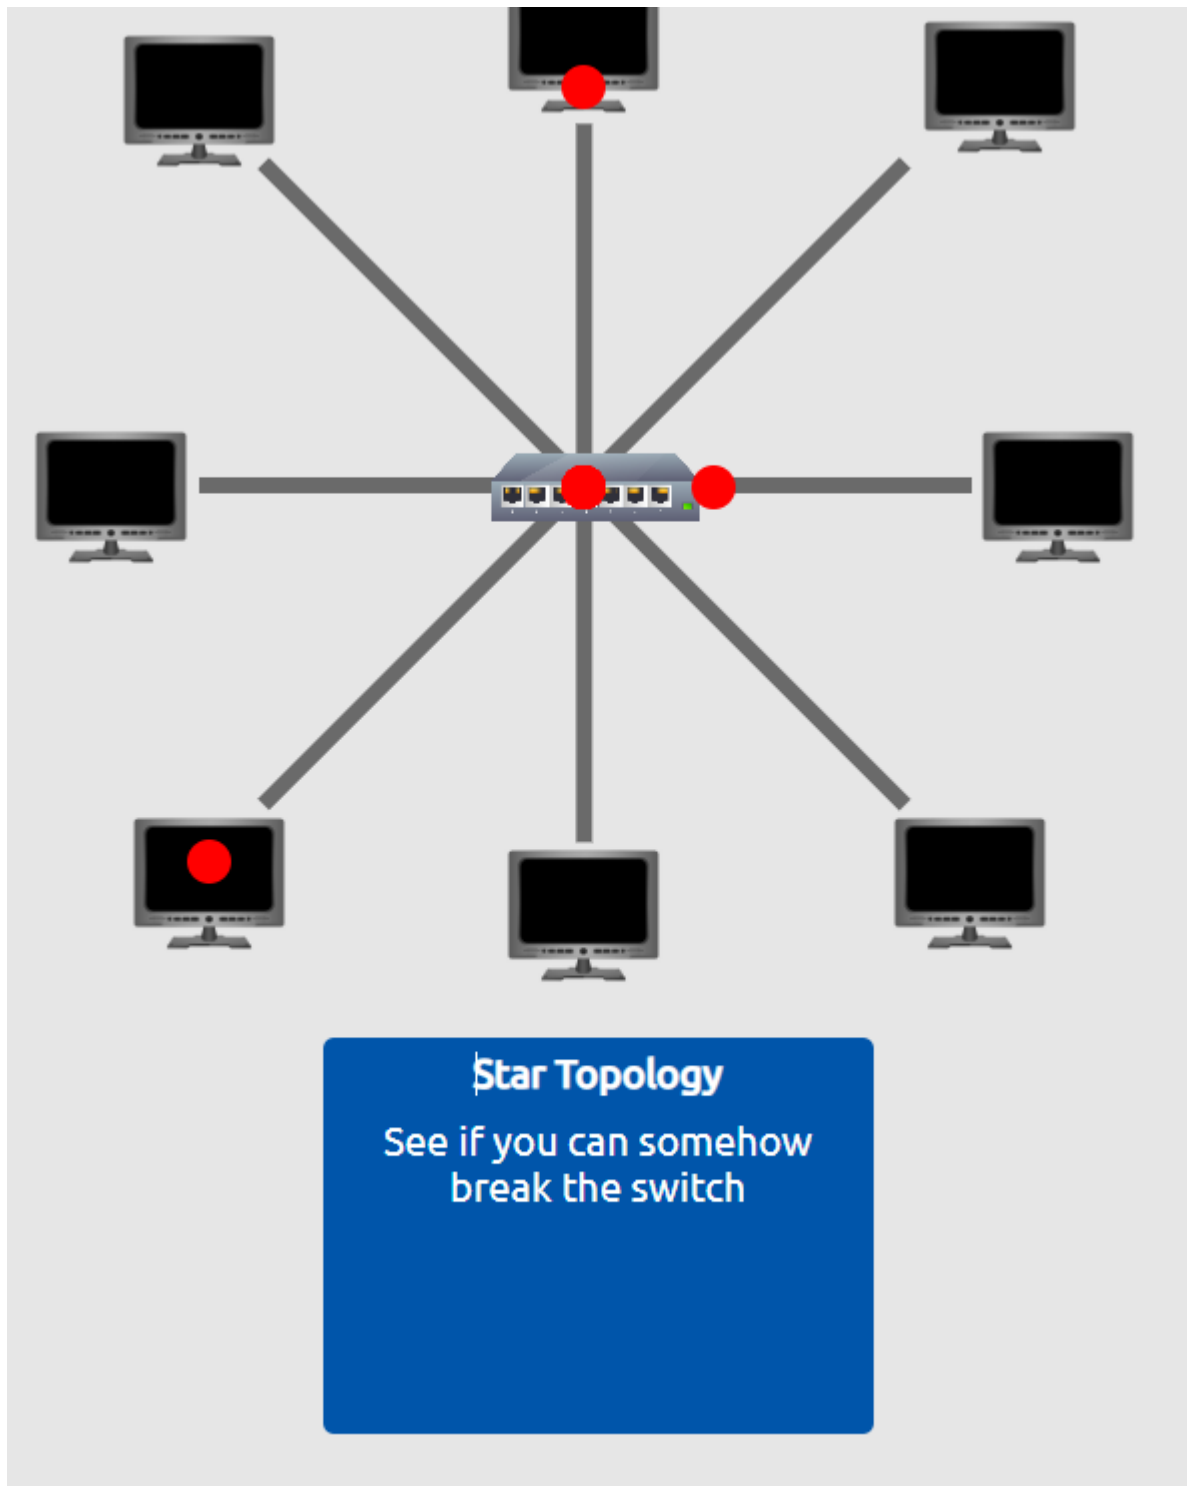

next

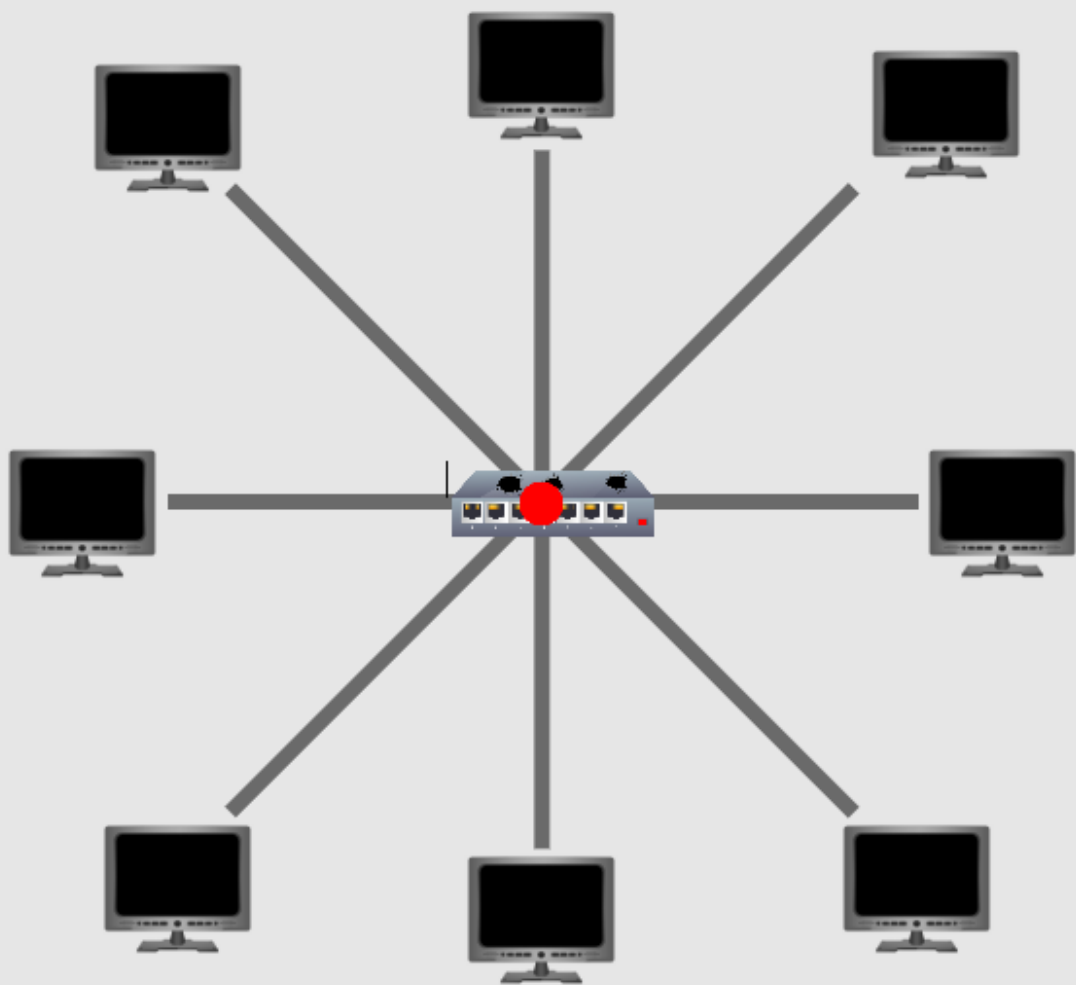

Star Topology

Every packet is sent through this switch, which means if the switch goes down the network will no longer work

next

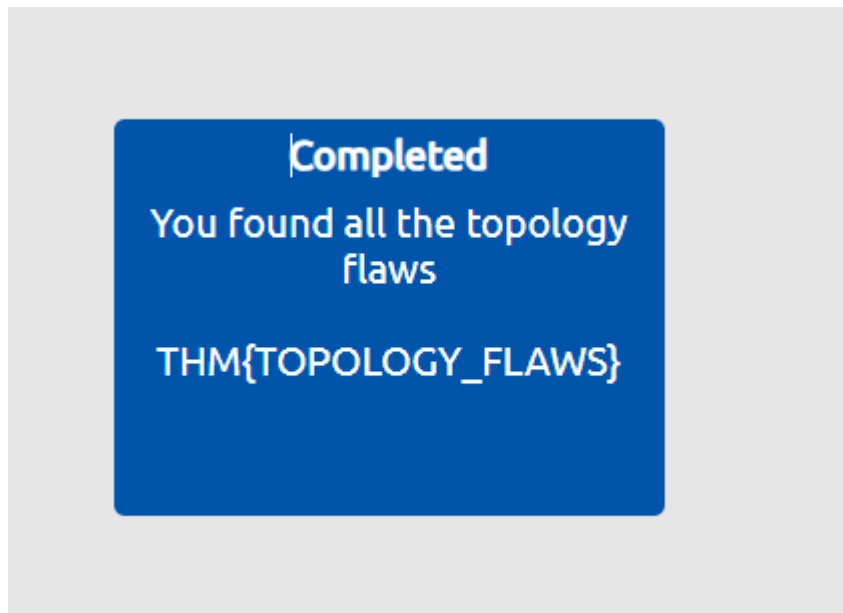

With hammer I broke the switch

Star Topology

The network is now down

next

Quiz:

What does LAN stand for?

Local Area Network

✓ Correct Answer

What is the verb given to the job that Routers perform?

Routing

✓ Correct Answer

What device is used to centrally connect multiple devices on the local network and transmit data to the correct location?

Switch

✓ Correct Answer

What topology is cost-efficient to set up?

Bus Topology

✓ Correct Answer

What topology is expensive to set up and maintain?

Star Topology

What topology is expensive to set up and maintain?

Star Topology

✓ Correct Answer

Complete the interactive lab attached to this task. What is the flag given at the end?

THM{TOPOLOGY_FLAWS}

✓ Correct Answer
