

DNS in detail Practical

Using the website , we can build requests to make DNS queries and view the results. The website will also show you the command you'd need to run on your own computer if you wished to make the requests yourself.

DNS Type ▼

subdomain

Send DNS Request

```
user@thm:~$ nslookup website.thm
```

The image shows a web interface for sending DNS requests and a terminal window below it. The web interface has a dropdown menu labeled 'DNS Type' with a downward arrow, a text input field containing 'subdomain', and a blue button labeled 'Send DNS Request'. Below this is a terminal window with a dark background and a light blue title bar. The terminal shows the command 'nslookup website.thm' being entered at the prompt 'user@thm:~\$'.
